## MyStudySchedule Website

### Background

The client wanted to create a simple and easy to use solution for students as well as teachers to organize their classes, tasks, and exams. The idea of developing the MyStudySchedule website was to provide a digital solution that can keep track of classes and assignments more effectively.

### Solution

The GCT team built the MyStudySchedule website for students and teachers so that they can save their schedule, view and update it anytime, and also add classes or other meetings to their schedule. This website displays the classes for the day and a separate tab where the user can enter assignments and due dates.

The website has the following features:

1. Create account
2. Enter assignments
3. Enter study times
4. View Schedule
5. Update Schedule
6. Print Schedule
